

Control the pH of your tank/reservoir AUTOMATICALLY!

The **MC122 PRO** pH controller and dosing pump (**MP810/MP815**) provides fully automated pH control of aqueous solutions in hydroponic systems. It has been specifically designed to control the pH in mixing tanks for fertirrigation. The small and precise flow of the peristaltic pump allows you to maintain ideal pH values in your tank.

After selecting the desired pH setting from 5.5 to 9.5 pH, the pH controller measures the pH value of the solution and automatically adds pH adjustment (acid or alkaline) to change the liquid's pH to the selected level.

The **MP815** pump is with adjustable flow rate and dosing can be reduced by using a timer to turn the pump on and off at regular intervals.
